

WEBSITE · STOCK MANAGEMENT · CUSTOMER RELATIONSHIPS

Your stock. Your customers. Your next sale.

A website for your customers. A stock assistant on your phone.
A place to keep every lead moving.

• Customer website

• Telegram stock assistant

• Sales CRM

A visual walkthrough of the website and interactive concepts.

BUILT AROUND A NORMAL DAY AT THE DEALERSHIP

From a new arrival to the next customer.

Three simple tools, each with a clear job.

PROPOSED CONNECTION The demos show each part of this workflow. Connecting live stock, enquiries and customer records is the next implementation phase.

A SHOWROOM CUSTOMERS CAN VISIT ANYWHERE

Make the car the starting point.

Put stock, photos and the next step within easy reach.

ADD A LISTING THROUGH A GUIDED CHAT

New stock, from the showroom floor.

A guided Telegram flow gets a new vehicle ready to publish.

- Add new vehicle
- Update listing
- Mark vehicle sold

- 1 Send the vehicle photos.**
Tap Add new vehicle, then send an album from your phone.
- 2 Confirm registration and state.**
The concept demonstrates a vehicle lookup, with manual details as a fallback.
- 3 Add kilometres and price.**
Answer the remaining questions and review the listing before publishing.
- 4 Confirm the listing.**
The new car appears in the website preview in the demo.

The intended benefit: prepare a listing where you already have the car and its photos, with a final check before it goes online.

Interactive concept. The real Telegram bot, lookup provider and publishing connection still need to be implemented.

THE SAME MENU HANDLES THE EVERYDAY CHANGES

Add it. Update it. Mark it sold.

The demo shows the conversation beside the stock preview, so the result is visible.

NEW ARRIVAL

Add new vehicle

Photos and car details become a listing after your confirmation.

LISTING CHANGE

Update listing

Change price, details or photos, review the result, then save.

DEAL COMPLETED

Mark vehicle sold

Confirm the sale and move the car from available to sold stock.

INTERACTIVE DEMONSTRATION

The preview changes as you use it. The public stock website stays unchanged.

A WORKSPACE BUILT AROUND CAR ENQUIRIES

Know who's interested and what's next.

A customer list with the context you need before the next call.

M Madi

Today, 9:20 am

Test drive confirmed for 2:30 pm today. Have the Clubsport ready and allow time for a trade-in appraisal.

M Madi

Yesterday, 10:15 am

Looking for a manual V8. Budget around \$60k. Wants to trade in her SV6 and keep finance repayments similar.

SM

Sarah Mitchell

A sample lead in the mockup

“Looking for a manual V8. Budget around \$60k. Wants to trade in her SV6.”

VEHICLE INTEREST

2015 HSV Clubsport R8

The car and asking price stay with the enquiry.

THE NEXT STEP

Test drive · Today, 2:30 pm

A follow-up date and time keep the action clear.

This is an illustrative customer scenario. The demo's edits stay in the current page and reset on refresh.

TRADE-IN & FINANCE

2013 Commodore SV6 · Pre-approved

Useful context before discussing the deal.

CONVERSATION HISTORY

Comments and stage changes

Add what was discussed and what needs to happen next.

START WITH THE PART THAT HELPS MOST

A clear direction. Then the real connections.

The previews make the experience tangible before we build the working system.

READY TO EXPLORE

The website and interactive demos

- Customer website with sample stock and enquiry options.
- Stock assistant with add, update and sold workflows.
- CRM with customers, stages, comments and follow-ups.

NEXT IMPLEMENTATION PHASE

Turn the concepts into daily tools

- Use verified vehicle content and dealership-owned photos.
- Connect a real Telegram bot, vehicle lookup and stock publishing.
- Add a shared customer database, staff access and agreed enquiry handling.

Let's walk through it and choose the first priority: stock management, lead follow-up, or both.

The online presentation includes links to the website and interactive demos.
